INDUSTRY EXPERIENCE

[HELIX RE](#) (proptech startup) – Front-End Engineer 03/2019 – 12/2019

- Developed the corporate website, worked mostly on the SaaS product.
- Added i18n support to the main product, refactored a significant portion of the codebase.
- Participated in peer code reviews and QA process.
- Documented internal process for engineering recruitment and conducted ATS vendor selection.
- Designed, presented, and delivered the internal design system.
- Conducted and participated in user interviews to develop product roadmap and test released features.

[Nettoken](#) (cybersecurity startup) – Front-End Engineer 01/2018 – 03/2019

- Produced MVP used to secure a £100k+ Seed Round investment.
- Developed a Chrome extension for collecting and autofilling web form credentials.
- Released the web dashboard used to manage credentials, user account, and corporate website.
- Published the iOS version of the application.
- Created internal tools for updating web content and monitoring builds; built CI/CD pipelines.

[Weco](#) (social media startup) – Full-Stack Engineer 04/2017 – 03/2018

- Refactored Node.js back-end, fixed bugs reported by community, added support for user-friendly errors.
- Developed features to display user's previous votes on posts and comments, and delete comments.
- Open sourced the Weco codebase.
- Refactored AngularJS front-end and completely rewrote CSS using BEM to reduce complexity.

[Warkk](#) (adtech startup) – Founder Since 12/2016

- Conducted market research by interviewing 1,000+ people.
- Built a community of 2,500+ members.
- Designed, developed, and tested the MVP with 50 users, decided to pivot the product.
- Completed the [YC Startup School](#) course, moderated our group, scheduled the Office Hours.

Self-Employed Since 06/2016

- Wrote blog drafts for Clearbit and Heap Analytics on machine learning, integrations, and product analytics.
- Designed and developed Wordpress websites.

LEISURE PROJECTS

- Contributed to Mozilla Developer Network Docs.
- Contributor to Hackernoon, an independent tech media site.
- [CodePen](#). A collection of small front-end projects and experiments.
- [Picasso](#). A tool for generating random colours and palette inspiration.
- [Store+](#). Online store-front concept inspired by Apple. Developed a large chunk of [iOS in JavaScript](#), too.
